

Satii Number System

In the Satii numbering system, any grouping divisible by four is considered favorable and auspicious, but if one more can be added to that number, a mysterious quality and strength enhances the grouping. This added number/element is called the *dii*; it is distinct and separate from the others, yet is also part of the whole. One need look no further than their own hand to see an example of the dii: the thumb is the dii of the hand, separate and distinct from the other four fingers but an essential part of the whole. In a group of four, the dii is the fifth; in a group of eight, the dii is the ninth; in a group of twelve, it is the thirteenth, and so on.

 1	 2	 3	 4	 5	 6	 7	 8	 9
 10	 11	 12	 13	 14	 15	 16	 17	 18
 19	 20	 21	 22	 23	 24	 25	 26	 27
 28	 29	 30	 31	 32	 33	 34	 35	 36
